Meade's new LX85 Series features a high-quality, portable, GoTo, German equatorial mount. The LX85 Series is the perfect choice for the cultivated observer and astro-imager looking to chase deep sky objects such as galaxies, star clusters, nebulae, and more. With the included AudioStar® hand controller, you have easy access to a database of over 30,000 objects, that you can view with a simple press of a button! AudioStar® features a built-in speaker that plays educational content about the celestial objects you view! Use as a stand-alone mount or maximize your viewing potential with an array of different optical tubes to choose from. Meade's LX85 Series will keep you looking up for many years to come and sets a standard for mid-sized telescopes at a great price.
